

The Career Garden

Building bridges between educational institutions
and companies via remote and hybrid internship

What is The Career Garden ?

8 partners from 5 countries formed a partnership to develop virtual internships with companies to be used by students. The project responds to dynamic developments in the EU labour market and the related need of companies to recruit motivated trainees. 30 multilingual modules will be produced, consisting of different elements such as interviews, virtual company tours, research and practical tasks, an e-learning sequence and quizzes - all available on an innovative web platform that students can access at home or at school

Opportunities for students

Gain insights into vocational training, different industries and requirements of specific professions

Receive support in career orientation

Get to know companies in Europe and maximise job opportunities

Opportunities for companies

Develop digital internships

Find motivated trainees and prepare them for working life in order to reduce the drop-out rate

Network with participating companies from other countries

Opportunities for teachers

Improve the general image of vocational education and training

Receive helpful material to better prepare students for internships, apprenticeships and career decisions

The project focuses in the following areas: IT, medical, craft and construction, hotel and catering and the educational sector.

By providing virtual internship formats, borders between countries are bridged and more young people can discover Europe and its possibilities.
